4 Courses

Sustainable Regional Principles, Planning and Transportation

Sustainable Neighborhoods

Sustainable Transportation Networks and Streetscapes

Transportation, Sustainable Buildings, Green Construction

Sep 16, 2024

Rahul Ashok Jeyalakshmi

has successfully completed the online, non-credit Specialization

Sustainable Cities

In this specialization learners develop and hone essential skills for achieving the objective of creating successful sustainable cities through the application of multiple smart growth strategies. These strategies include leveraging public transportation, smart streets, walk-ability, biking & parking policies. As well as, green space protection, parks, recreational areas & sourcing quality food from local growers, providing a spectrum of housing availability, integration of office, retail & housing spaces, reduction in the urban pollution footprint and others. The specialization also focuses on the evaluation and assessment of real-world case studies of successful smart growth projects in San Antonio, Houston, Chattanooga, and Fairfax County.

William E. Roper, PhD, P.E., SES, Professor, Johns Hopkins University, Baltimore, MD, Whiting School of Engineering, Engineering for Professionals Program

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
