3 Courses

Sustainability and the Circular Economy

Applied Sustainability Engineering

Leading the Circular and Sustainable Business

Oct 13, 2024

Rahul Ashok Jeyalakshmi

has successfully completed the online, non-credit Specialization

Applied Sustainability for Technical Managers

In this Specialization, learners developed essential knowledge and skills for integrating sustainability into their personal lives and in the companies where they work. These include explaining the science of climate change to a non-technical audience, understanding the economics behind the transition to renewable energy sources, conducting a carbon footprint analysis, identifying sustainable marketing and financial metrics of triple bottom line accounting. Learners completed several projects throughout the Specialization to apply their new knowledge and skills.

Michael J. Readey, Ph.D.
W. Edwards Deming Professor of Management Engineering
Management Program
College of Engineering & Applied Science
University of Colorado Boulder

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
