3 Courses

Fundamentals of Robotics & Industrial Automation

Robotics Engineering & Applications

Industrial Fluid systems & Smart Factory Automation

Aug 13, 2024

Rahul Ashok Jeyalakshmi

has successfully completed the online, non-credit Specialization

Collaborative Robotics in Industry

Collaborative Robotics in Manufacturing blends traditional methods with cutting-edge robotics, equipping learners with skills for modern manufacturing. Foundational knowledge in Industrial Manufacturing emphasizes robotics' role in enhancing efficiency. Introductory Mechatronics integrates engineering principles for robotic system development, while understanding Introductory Electronics aids in comprehending digital control circuitry and sensor technologies. Applied Physics principles provide analytical tools for robotic system design. Graduates excel in Robotic Manipulator and Gripper Design, integrating Mechanical Components with Digital Control Circuitry for optimized performance.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
